

Bring your practice to life as you come to your senses!

THE TRANSFORMATIONAL ART OF 5-ELEMENT ACUPUNCTURE

Presented by

Lynn Schwartz, L.Ac.; Board Certified NCCAOM

Saturday/Sunday, March 17-18, 2007

Are you ready to take the next step in the art of patient diagnosis and treatment? This small group seminar is an in-depth review of the basics of 5-element acupuncture with emphasis on the use of the senses (CSOE) to diagnose and treat patients. Together we will pierce the illusion of separateness of patient/practitioner and in the process discover what it means to embark on a healing journey with your patient.

This seminar will provide a laboratory in which you interact with a patient using the senses (CSOE) and receive direct feedback and coaching. The strong intention is to have you, the practitioner, transform your way of being with patients in order to access their deep healing energy. As you deepen your understanding of your own humanity, you will develop compassion for yourself and your patients. We will discuss the ethical issues involved in this healing process. You will discover yourself being more confident and effective! Treatment planning skills will come effortlessly! You will be encouraged to explore the conversations that block extraordinary action. You will be energized and your practice will flourish. As you grasp the levers and dials of personal transformation, you will ultimately be empowering your patients!

Seminar Fee...\$195;

Optional: Bring your own patient for coaching to the next level of their healing. Fee...\$150
